Managing change

Everyone processes change in different ways and at different rates. However, as a leader, you play a critical role in effectively guiding staff through changes in the workplace. Consider these tips to help you motivate and encourage your team:

- Be clear and honest when communicating change.
- Tell your team what's in it for them.
- Share as much information as possible.
- Praise your team's efforts to embrace change.
- Use compelling visuals to create a tangible vision of the future.
- Encourage your team not to view challenges and setbacks as failures.

Financial wellbeing*

Financial concerns can be stressful even for seasoned leaders. To help get your finances on track, you can take advantage of an experienced, certified Money Coach. Money Coaches provide personalized financial coaching support over the phone. You can also access online resources such as financial assessments, budgeting software and on-demand courses. Mind Your Mental Health

March 18–24 is National Drug and Alcohol Facts Week®

Observed during the third full week of March, National Drug and Alcohol Facts Week is meant to inspire dialogue about the science of drug use and addiction among Americans, particularly youth. Seventy percent of users who try an illegal drug before age 13 develop a substance misuse condition within the next seven years, compared to 27% of those who try an illegal drug after age 17.

Efforts to prevent teen substance misuse should start early in life. To help prevent substance misuse:

- Keep your teen busy with meaningful activities, such as sports or other group activities.
- Expect your teen to follow household rules.
- Keep talking with your teen. Praise your teen for success.

Working on Wellbeing

Career wellbeing

Career wellbeing involves looking forward to daily challenges and working at something that engages your skills, interests and leadership abilities. Analysis by Gallup has shown that career wellbeing—liking what you do every day—has the strongest impact on your overall wellbeing. People with high career wellbeing are more than twice as likely to be thriving in their lives overall. Elements of career wellbeing include continuous learning and providing conscientious service to others.
